

BSH EDI Delivery Schedules: Message format with “pickup-date”

In future the BSH SA releases will contain a new flag, which identifies the scheduling line date as ***pickup-date*** or ***delivery date***.

For the new ***pickup-date*** there will be no additional data field inside the EDI message – it will be written into the same field as used for the ***delivery date***. So the field scheduling line date will contain one of these dates, a qualifier will identify whether it is the ***pickup*** or ***delivery date***.

In future the BSH also can send the detailed time with the scheduling line date. This request is written inside the documentation already.

The vendors conversions have to be checked according to these changings and have to be adjusted if necessary!

Independent from these adjustments, we recommend our partners to use the new message „BSH Global DELFOR“ in future.

Overview about currently used formats:

1. BSH Global DELFOR (EDIFACT DELFOR D.04A S3 related to VDA 4984)

There will be no changings with “BSH Global DELFOR”, the message contains the requirements already.

Starting on 20.03.2017 the delivery date / pickup-date will identified inside the transfer.

Link to SA-release docu:

<https://fx.bsh-partner.com/info/index.html#deliverySchedule>

Excerpt from docu:

```
DTM 29 DTM+2:20160725:102' 2 Delivery date/time, requested
DTM+2:201607252314:203' 10 Pick-up date/time, requested
102 CCYYMMDD
203 CCYYMMDDHHMM
```

Example: https://fx.bsh-partner.com/info/Docu/Messages/DeliverySchedule//DELFOR/BSH_GLOBAL_DELFOR_D04A_Example4_with_pickup_date.txt

2. BSH CSV file

The CSV file format has 2 free fields at the end of record. The first one will contain the date identifier. The second one can be used for the time (HHMM) in future.

Starting on 20.03.2017 the delivery date / pickup-date will identified inside the transfer.

csv file: https://fx.bsh-partner.com/info/Docu/Messages/DeliverySchedule/CSV/CSV_DELFOR01_with_pickup_date.csv

3. BSH BISS ABR

On „BISS ABR“ we added 2 new data fields.

The new fields will be available with the transfers starting on **1.6.2017**.

4. Archive: VDA 4905

With VDA 4905 it will be not possible to send detailed time for the scheduling line date in future. We recommend to change the process to „BSH Global DELFOR“.

For the date identifier we use field 18 „Accounting key“ (Kontierungsschlüssel) in sentence 512.

Content: D = delivery date, P = pickup-date.

The delivery date / pickup-date will be identified with the transfers starting on **1.6.2017**.

https://fx.bsh-partner.com/info/Archive/Messages/DeliverySchedule/VDA/VDA4905-BSH-DE-EN_2.pdf

Example: https://fx.bsh-partner.com/info/Archive/Messages/DeliverySchedule/VDA/VDA4905_with_pickup_date.txt

5. Archive: EDIFACT DELFOR 91.1 (BSH standard and Spanish version)

At „EDIFACT DELFOR 91.1“ the requirements on date segments DTM in group G11 are considered.

date identification:

2 = delivery date

10 = pickup-date (new!)

Time:

102 = CCYYMMDD

203 = CCYYMMDDHHMM (new)

The delivery date/pickup-date will be identified with the transfers starting on **1.6.2017**.

DELFOR 91.1 Docu, see last page:

English:

https://fx.bsh-partner.com/info/Archive/Messages/DeliverySchedule/DELFOR/DELFOR6_EN.pdf

German:

<https://fx.bsh-partner.com/info/Archive/Messages/DeliverySchedule/DELFOR/DELFOR6.pdf>

Example: https://fx.bsh-partner.com/info/Archive/Messages/DeliverySchedule/DELFOR/DELFOR911_with_pickup_date.txt

6. Archive: MINI-DELFOR 91.1 (alternative version (001) with multiple positions. E.g. used by IBM customers).

There will be no adjustments on this format. Transfers with this format will be stopped at the end of year 2017. We recommend to change the process to „BSH Global DELFOR“.
